## Problem 1

$$0 \leq \rho \leq R, 0 \leq \theta \leq 2\pi, 0 \leq \phi \leq \pi$$

$$\int_0^\pi \int_0^{2\pi} \int_0^R \rho^2 \sin(\phi) \, d\rho d\theta d\phi$$

---

### Solution

$$\begin{aligned} \int_0^R \rho^2 \, d\rho &= \left. \frac{\rho^3}{3} \right|_0^R = \int_0^{2\pi} \frac{R^3}{3} \sin(\phi) \, d\theta = \frac{2\pi R^3 \sin(\phi)}{3} \\ \frac{2\pi R^3}{3} \cdot \int_0^\pi \sin(\phi) \, d\phi &= -\left. \frac{2\pi R^3 \cos(\phi)}{3} \right|_0^{\phi=\pi} \\ &= -\frac{2\pi R^3(-1)}{3} + \frac{2\pi R^3(1)}{3} \\ &= \boxed{\frac{4\pi R^3}{3}} \end{aligned}$$

---

## Problem 2

$$0 \leq \rho \leq 2, 0 \leq \theta \leq 2\pi, 0 \leq \phi \leq \pi/6$$

$$\int_0^{\pi/6} \int_0^{2\pi} \int_0^2 \rho^2 \sin(\phi) \, d\rho d\theta d\phi$$

---

### Solution

$$\begin{aligned} \int_0^2 \rho^2 \, d\rho &= \left. \frac{\rho^3}{3} \right|_0^2 = \frac{8}{3} \\ \int_0^{2\pi} 1 \, d\theta &= 2\pi \\ \int_0^{\pi/6} \frac{16\pi \sin(\phi)}{3} \, d\phi &= \frac{16\pi}{3} \cdot \int_0^{\pi/6} \sin(\phi) \, d\phi = \cos(\pi/6) = \frac{\sqrt{3}}{2} \\ \frac{16\pi \cos(\phi)}{3} \Big|_0^{\phi=\pi/6} &= -\frac{16\pi \frac{\sqrt{3}}{2} + 16\pi}{3} \\ &= \boxed{-\frac{8\sqrt{3}\pi + 16\pi}{3}} \end{aligned}$$

---

### Problem 3

$$x = \frac{u}{v+5}, y = \frac{uv}{v+5}$$

$$\iint_D 5x + y \, dA$$

### Solution

$$5x + y = 3, 5x + y = 6, y = x, y = 2x$$

$$(5x + y = 3) = \left( 5 \left( \frac{u}{v+5} \right) + \frac{uv}{v+5} = 3 \right)$$

$$\frac{u(5+v)}{v+5} = 3 \text{ or } u = 3$$

$$5x + y = 6, u = 6$$

$$y = x : \frac{uv}{v+5} = \frac{u}{v+5}, uv = u, v = 1$$

$$y = 2x : \left( \frac{uv}{v+5} = 2 \left( \frac{u}{v+5} \right) \right) = \frac{uv}{u} = \frac{2u}{u}, v = 2$$

$$u = 3, u = 6, v = 1, v = 2, [3, 6] \times [1, 2]$$

$$\frac{\partial x}{\partial u} \cdot \frac{\partial y}{\partial v} - \frac{\partial x}{\partial v} \cdot \frac{\partial y}{\partial u}$$

$$\begin{bmatrix} x_u & x_v \\ y_u & y_v \end{bmatrix} = \begin{bmatrix} \frac{1}{v+5} & \frac{-u}{(v+5)^2} \\ \frac{v}{v+5} & \frac{5u}{(v+5)^2} \end{bmatrix}$$

$$= \left( \frac{1}{v+5} \cdot \frac{5u}{(v+5)^2} \right) - \left( \frac{-u}{(v+5)^2} \cdot \frac{v}{v+5} \right)$$

$$= \frac{5u}{(v+5)^3} - \frac{-uv}{(v+5)^3}$$

$$= \frac{5u + uv}{(v+5)^3}$$

$$\text{Jacobian} = \frac{u}{(v+5)^2}$$

$$5x + y = 3 \text{ or } u$$

$$\int_1^2 \int_3^6 \frac{u^2}{(v+5)^2} \, du \, dv = \int_3^6 u^2 \, du \cdot \int_1^2 \frac{1}{(v+5)^2} \, dv$$

$$\int_3^6 u^2 \, du = \frac{u^3}{3} \Big|_3^6 = 72 - 9 = 63$$

$$\int_1^2 \frac{1}{(v+5)^2} \, dv = \frac{-1}{v+5} \Big|_1^2 = \frac{1}{42}$$

$$63 \cdot \frac{1}{42} = \frac{63}{42} = \boxed{\frac{3}{2}}$$
